ODE TO THE 5TH CULTURE – THE ALCHEMY OF IN100Y

A procession led by the agents of the fictional travel agency Future Mind Tours will show and celebrate a contemporary reflection on culture 100 years from now.

The first four gatherings at the *In 100 Years'* seminars has taken place, and now the time is ripe for the 5th. People from different fields of society, science and humanities came together to share their knowledge and create collective images of sustainable futures. The project, its knowledge production and its vision was inspired by the four elements: Water, Earth, Air and Fire. In the process, the making of a new culture has been stirring – A 5th culture.

You're welcome to take part in the procession and the ritual.
